ABOUT ME

Android development enthusiast, looking for good software implementations. I like to learn new things about technology and solve problems with good music and code. I would like to grow professionally and actively collaborate as a team.

SKILLS

Programming languages

Java, Kotlin, SQL, PHP, C#, HTML, CSS, JavaScript.

Libraries & Frameworks

- Android: AndroidX, Jetpack, Material Design, RxJava, Retrofit, Volley, Picasso, Timber.
- Web: Laravel, Botman, jQuery.

Tools & Platforms

Android SDK, Git, SQLite, MySQL, GitHub, Postman, Composer, XAMP, Heroku, StartUML, Adobe XD.

RELEVANT EXPERIENCE

Android Developer - Bitzero   April 2019 – February 2020

- Developed features of the projects in a modular and robust way with Kotlin and Java.
- Conceptualized and designed of the UI with XML, the designs had tendency to Material Design.
- Charged of implementing the data persistence of the applications with SharedPreference and Room.
- Integrated the navigation component of Jetpack to facilitate the scalability of possible new features in the projects.
- Integrated Volley and Retorfit as tools to manage requests and responses to web services.
- Helped to solve logic errors in the code, design patterns and other implementations during the development of the projects.

EDUCATION

Instituto Tecnológico de Tuxtla Gutiérrez   August 2014 - December 2018

- Ingeniería en Sistemas Computacionales

LANGUAGE

- Spanish – Native
- English – Lower intermediate

INTERESTS

Mobile and web development, software engineering, technology events, technical talks, writing, music and video games.
